【notes】

- For scholarships that require the university to recommend candidates, a selection committee screens students using the registration forms submitted in April and October.
- The selection committee takes a comprehensive perspective in evaluating each student (student's academic record, financial resources and past scholarships, etc.).
- **Students may only apply for one scholarship at a time** except for the scholarship that can be paid together. (Applicants for a scholarship may not apply for any other scholarship until they receive notice of the results.)
- When other scholarships become available, the Student Affairs Department will post information on the notice board
- The above schedule may be changed.
